N95 MASK

The N95 mask is one of nine particulate protective masks certified by NIOSH (National Institute for Occupational Safety and Health). N95 is not a specific product name. As long as it meets the N95 standard and passed the NIOSH review, it can be called a N95 mask, which can filter particles with an aerodynamic diameter of $0.075\mu\text{m} \pm 0.020\mu\text{m}$ and achieve an efficiency of over 95%.

REUSABLE MASK

【Safety】

High-efficiency filtration of up to 98.7% four-layer filtration system, efficient filtration of particulate matter in pollution sources such as haze, bacteria, viruses, strong sealing, one-way circulation of airflow, reducing cross infection

【Comfortable】

The mask is made of food-grade silicone material certified by the US FDA.

【profession】

The company has many years of experience in research and development of high-quality masks. This product is the latest product developed by the company.

【Can be used multiple times】

The filter element can be used multiple times and replaced once every two weeks with low replacement cost.

DISPOSABLE ISOLATION CLOTH

【Isolation Garment Use】

It is mainly used for visits to customers of animal breeding places such as quarantine inspection, food clenbuterol detection, pesticide animal husbandry, infectious disease isolation treatment, laboratory reagent experiments, pig farms, cattle farms, and other animal breeding places. Leader inspection. Beauty treatments, fumigation treatments. Spray painting and sanding protection, glass wool insulation installation, petroleum exploration, installation of precision instruments, biopharmaceuticals, human joint manufacturing, production of Class II and III medical equipment, etc., are required to be used in places where the human body is completely isolated.

【Isolation specifications】

160 / (cm), 170 / (cm), 175 / (cm), 180 / (cm), 185 / (cm), can also be customized according to requirements.

【Isolation clothing material thickness】

35g, 45g, 50g, 55g, 60g, 65g, 70g (The thickness of non-woven fabric is measured by the weight per square meter, such as: the greater the weight The thicker it is.

【Packing quantity of isolation clothing】

(box size: 33cm * 39cm * 60cm) Each protective clothing is individually packaged, and each carton packs 50 pieces. Bags can be shipped with or without trademarks.

【Isolation clothing color】 White, blue, green. (Non-toxic and odorless)

【Isolation method of isolation clothing】 Vacuum packaging, ethylene oxide sterilization.

CONJOINED PROTECTIVE CLOTHING

- spp nonwoven,light, soft, air-permeable
- unique design of one piece covering whole body.
- zipper front closure
- easy to put on and off
- regular: spp30g,spp40g,spp50g,
- size:58*137cm, 60*173cm, 80*186cm
- color: white, dark blue
- package: 1pcs/bag,50bag/ctn

DISPOSABLE MEDICAL RUBBER INSPECTION GLOVES

According to the surface type is divided into hemp surface, smooth surface, powder surface, no powder surface four. According to the size of different into 6, 6.5, 7, 7.5, 8, 8.5, 9 seven specifications.

MEDICAL FACIAL MASK

【Product features】

This product is a new protection product integrating eye, nose and nose protection. It is composed of highly transparent double-sided anti-fog PET sheet, sponge, resin button and rubber band. It is widely used in hospitals, dentistry and other health research institutions, Medicine, food, cosmetics and other industries. Wearing on the user's forehead can not only absorb sweat, but also relieve the pressure caused by long-term wearing. The unique grooved sponge design can increase air flow and enhance the comfort of medical staff when wearing it.

【Design concept】

1. Imported PET film, high transparency, anti-scratch, super acid and alkali resistance;
2. Reasonable structure, suitable for workers of various head types, can directly cover myopia glasses, convenient for work;
3. This product can effectively avoid infections caused by the blood and body fluids of people carrying viruses during medical treatment and accidents;
- 4, light weight, ergonomic design, built-in soft cushions to reduce the pressure on the forehead of the hat body, comfortable to wear, no sense of pressure;
- 5, anti-fog performance is good, PET protective film is faster than ordinary film diffuse fog, and also added a unique diffuse fog mouth design, to give you a clear vision at any time;
6. Wear firmly and reliably, without bending or bowing.
- 7, large protection area, good effect, the protection range can reach the entire face, because of its economic benefits, excellent price-performance characteristics, etc., welcomed by the majority of users.

【Product specifications】 32 * 19 * 0.018cm, 32 * 22 * 0.018cm, 32 * 24 * 0.018cm; sponge specifications: 23 (± 0.5) * 3 (± 0.2) cm; sponge colors: white, black, blue

【Elastic band specifications】

1.5 (± 0.1) * 32 (± 0.2) cm;

Packing: 1 pc / bag, 200 pcs / carton

【Box gauge】 69 * 44.5 * 37.5cm

MEDICAL PROTECTIVE GLASS

Safety protective glasses are a kind of glasses that play a special role. The glasses for different needs in different occasions are different. Such as surgical glasses for hospitals, welding glasses for welding, laser protective glasses for laser engraving, and so on.
